## FOREWORD

This seventeenth edition of the *Annual Supplement to the Canadian Statistical Review* gives historical detail for the selected economic indicators appearing in Section 1 of the monthly *Review*. The latest revised monthly and quarterly data, both seasonally adjusted and unadjusted are given for these indicators up to December 1977. They may be best updated by referring to current issues of the *Review*.

Series published in the *Supplement* are available from CANSIM. All or any part of the CANSIM data bank contents may be purchased on magnetic tapes or as computer printouts. The CANSIM identifiers appear with each series and should be used when ordering series. For further information direct inquiries to:

Canadian Statistical Review,  
23 M, R. H. Coats Bldg.,  
Statistics Canada,  
Ottawa, K1A 0T6

### Editor's Note

The CSR staff is always examining new ways of presenting information to its readers. Please do not hesitate to inform us of your needs and to offer us your suggestions.

## AVANT-PROPOS

Cette dix-septième livraison du *Supplément annuel de la Revue statistique du Canada* décrit en détail l'évolution de certains indicateurs économiques qui figurent à la section 1 des livraisons mensuelles de la *Revue statistique du Canada*. Les plus récentes données mensuelles et trimestrielles rectifiées y sont présentées, aussi bien avant qu'après désaisonnalisation, pour ces indicateurs et ce jusqu'en décembre 1977. La meilleure façon de les actualiser est de se reporter aux dernières livraisons de la *Revue statistique du Canada*.

Les séries présentées dans le *Supplément* sont stockées dans le CANSIM. On peut se procurer contre acquittement des frais l'ensemble ou une partie du contenu de la banque de données CANSIM sous forme de bandes magnétiques ou d'imprimés d'ordinateur. Les indicatifs du CANSIM accompagnent chacune des séries et doivent être utilisés pour une commande de séries. Pour de plus amples renseignements, s'adresser à:

### N.D.L.R.

Le personnel de la Revue est toujours à la recherche de nouveaux modes de présentation de l'information à ses lecteurs. N'hésitez pas à nous faire connaître vos besoins et à nous présenter vos suggestions.

## Note to Users

Data in this publication were retrieved from CANSIM (Registered Trade Mark of Statistics Canada for its Canadian Socio-Economic Information Management System) and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in the *Supplement* (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used in Statistics Canada is the U.S. Bureau of the Census Method II, X-11 variant. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD it is one, for the most erratic series it is six. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

## Note aux lecteurs

Les données qui apparaissent dans la Revue statistique du Canada ont été extraites du CANSIM (marque déposée de Statistique Canada pour son "Système canadien d'information socio-économique") et traitées pour donner une copie destinée à la photocomposition et à partir de laquelle cette publication est produite. CANSIM est la banque informatique de données de Statistique Canada. Les séries qui se trouvent dans le *Supplément* (ainsi que d'autres données) sont disponibles sur imprimés d'ordinateur, cartes, bandes ou par accès direct au terminal.

Le procédé utilisé pour la désaisonnalisation des séries chronologiques à Statistique Canada fait appel à l'application informatique d'un rapport à la moyenne mobile. Le programme informatique standard utilisé à Statistique Canada est le programme dit *Method II, X-11 variant* du U.S. Bureau of Census. La désaisonnalisation supprime les effets des variations répétitives qui se produisent dans l'année et sont imputables à l'évolution normale du climat, aux congés fixes, ou à d'autres événements qui se répètent à des intervalles réguliers.

Bien que la désaisonnalisation permette de mettre bien mieux en évidence la tendance fondamentale d'une série, les séries désaisonnalisées n'en contiennent pas moins des fluctuations irrégulières. De légères variations d'un mois à l'autre dans les séries désaisonnalisées peuvent être de simples mouvements irréguliers, et pour avoir une meilleure idée de la tendance fondamentale, les utilisateurs doivent examiner les séries désaisonnalisées d'un certain nombre de mois. Le M.D.C., ou mois à dominance cyclique, dans un tableau contenant des séries désaisonnalisées, donne le plus petit nombre de mois pour lesquels le taux de variation moyen compte non tenu du signe de la tendance générale, est supérieur à celui du facteur irrégulier. Dans le cas de la série la plus lisse possible, le M.D.C. est égal à un; dans celui de la série la plus irrégulière, il est égal à six. L'application d'une moyenne mobile dont la période est égale au M.D.C. tend à lisser les mouvements irréguliers pouvant dissimuler la tendance fondamentale.

## Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

CANSIM Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-0575) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

## Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Division CANSIM,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0575) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1-800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

## Note to Users

Data in this publication were retrieved from CANSIM (Registered Trade Mark of Statistics Canada for its Canadian Socio-economic Information Management System) and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in the Supplement (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used in Statistics Canada is the U.S. Bureau of the Census Method II, X-11 variant. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD it is one, for the most erratic series it is six. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

## Editor's Note

The CSR staff is always examining new ways of presenting information to its readers. Please do not hesitate to inform us of your needs and to offer us your suggestions.

## Note

In the tables, components may not necessarily sum to totals because of rounding.

## Note aux lecteurs

Les données qui apparaissent dans la Revue statistique du Canada ont été extraites du CANSIM (marque déposée de Statistique Canada pour son "Système canadien d'information socio-économique") et traitées pour donner une copie destinée à la photocomposition et à partir de laquelle cette publication est produite. CANSIM est la banque informatique de données de Statistique Canada. Les séries qui se trouvent dans le Supplément (ainsi que d'autres données) sont disponibles sur imprimés d'ordinateur, cartes, bandes ou par accès direct au terminal.

Le procédé utilisé pour la désaisonnalisation des séries chronologiques à Statistique Canada fait appel à l'application informatique d'un rapport à la moyenne mobile. Le programme informatique standard utilisé à Statistique Canada est le programme dit *Method II, X-11 variant* du *U.S. Bureau of the Census*. La désaisonnalisation supprime les effets des variations répétitives qui se produisent dans l'année et sont imputables à l'évolution normale du climat, aux congés fixes, ou à d'autres événements qui se répètent à des intervalles réguliers.

Bien que la désaisonnalisation permette de mettre bien mieux en évidence la tendance fondamentale d'une série, les séries désaisonnalisées n'en contiennent pas moins des fluctuations irrégulières. De légères variations d'un mois à l'autre dans les séries désaisonnalisées peuvent être de simples mouvements irréguliers, et pour avoir une meilleure idée de la tendance fondamentale, les utilisateurs doivent examiner les séries désaisonnalisées d'un certain nombre de mois. Le MDC, ou mois à dominance cyclique, dans un tableau contenant des séries désaisonnalisées, donne le plus petit nombre de mois pour lesquels le taux de variation moyen compte non tenu du signe de la tendance générale, est supérieur à celui du facteur irrégulier. Dans le cas de la série la plus lisse possible, le MDC est égal à un; dans celui de la série la plus irrégulière, il est égal à six. L'application d'une moyenne mobile dont la période est égale au MDC tend à lisser les mouvements irréguliers pouvant dissimuler la tendance fondamentale.

## Note du rédacteur-réviseur

Le personnel de la Revue est toujours à la recherche de nouveaux modes de présentation de l'information à ses lecteurs. N'hésitez pas à nous faire connaître vos besoins et à nous présenter vos suggestions.

## Nota

Dans ces tableaux, les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

## Introduction

This eighteenth edition of the *Annual Supplement to the Canadian Statistical Review* gives historical detail for the selected economic indicators appearing in Section 1 of the monthly *Canadian Statistical Review*. The latest revised monthly and quarterly data, both seasonally adjusted and unadjusted are given for these indicators up to December 1978. They may be best updated by referring to current issues of the *Canadian Statistical Review*.

### NOTE ON CANSIM

Series published in the Supplement are available from CANSIM. All or any part of the CANSIM data bank contents may be purchased on magnetic tapes or as computer printouts. The CANSIM identifiers appear with each series and should be used when ordering series. For further information direct inquiries to: Canadian Statistical Review, 23 M, R. H. Coats Bldg., Statistics Canada, Ottawa, K1A OT6.

## Introduction

Cette dix-huitième livraison du *Supplément annuel de la Revue statistique du Canada* décrit en détail l'évolution de certains indicateurs économiques qui figurent à la section 1 des livraisons mensuelles de la *Revue statistique du Canada*. Les plus récentes données mensuelles et trimestrielles rectifiées y sont présentées, aussi bien avant qu'après désaisonnalisation, pour ces indicateurs et ce jusqu'en décembre 1978. La meilleure façon de les actualiser est de se reporter aux dernières livraisons de la *Revue statistique du Canada*.

### NOTE CONCERNANT CANSIM

Les séries présentées dans le Supplément sont stockées dans le CANSIM. On peut se procurer contre acquittement des frais l'ensemble ou une partie du contenu de la banque de données CANSIM sous forme de bandes magnétiques ou d'imprimés d'ordinateur. Les indicatifs du CANSIM, accompagnent chacune des séries et doivent être utilisés pour une commande de séries. Pour de plus amples renseignements, s'adresser à: Revue statistique du Canada, 23 M, Édifice R.H. Coats, Statistique Canada, Ottawa, K1A OT6.

DEPOSITORY LIBRARY MATERIAL

## Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

CANSIM Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-0575) or to a local Advisory Services office:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

## Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Division CANSIM,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0575) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1-800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

## Note to Users

Data in this publication were retrieved from CANSIM (Registered Trade Mark of Statistics Canada for its Canadian Socio-economic Information Management System) and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in the Supplement (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used in Statistics Canada is the U.S. Bureau of the Census Method II, X-11 variant. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD it is one, for the most erratic series it is six. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

## Editor's Note

The CSR staff is always examining new ways of presenting information to its readers. Please do not hesitate to inform us of your needs and to offer us your suggestions.

## Note

In the tables, components may not necessarily sum to totals because of rounding.

## Note aux lecteurs

Les données qui apparaissent dans la Revue statistique du Canada ont été extraites du CANSIM (marque déposée de Statistique Canada pour son "Système canadien d'information socio-économique") et traitées pour donner une copie destinée à la photocomposition et à partir de laquelle cette publication est produite. CANSIM est la banque informatique de données de Statistique Canada. Les séries qui se trouvent dans le Supplément (ainsi que d'autres données) sont disponibles sur imprimés d'ordinateur, cartes, bandes ou par accès direct au terminal.

Le procédé utilisé pour la désaisonnalisation des séries chronologiques à Statistique Canada fait appel à l'application informatique d'un rapport à la moyenne mobile. Le programme informatique standard utilisé à Statistique Canada est le programme dit *Method II, X-11 variant* du U.S. Bureau of the Census. La désaisonnalisation supprime les effets des variations répétitives qui se produisent dans l'année et sont imputables à l'évolution normale du climat, aux congés fixes, ou à d'autres événements qui se répètent à des intervalles réguliers.

Bien que la désaisonnalisation permette de mettre bien mieux en évidence la tendance fondamentale d'une série, les séries désaisonnalisées n'en contiennent pas moins des fluctuations irrégulières. De légères variations d'un mois à l'autre dans les séries désaisonnalisées peuvent être de simples mouvements irréguliers, et pour avoir une meilleure idée de la tendance fondamentale, les utilisateurs doivent examiner les séries désaisonnalisées d'un certain nombre de mois. Le MDC, ou mois à dominance cyclique, dans un tableau contenant des séries désaisonnalisées, donne le plus petit nombre de mois pour lesquels le taux de variation moyen compte non tenu du signe de la tendance générale, est supérieur à celui du facteur irrégulier. Dans le cas de la série la plus lisse possible, le MDC est égal à un; dans celui de la série la plus irrégulière, il est égal à six. L'application d'une moyenne mobile dont la période est égale au MDC tend à lisser les mouvements irréguliers pouvant dissimuler la tendance fondamentale.

## Note du rédacteur-réviseur

Le personnel de la Revue est toujours à la recherche de nouveaux modes de présentation de l'information à ses lecteurs. N'hésitez pas à nous faire connaître vos besoins et à nous présenter vos suggestions.

## Nota

Dans ces tableaux, les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

## Introduction

This nineteenth edition of the *Annual Supplement to the Canadian Statistical Review* gives historical detail for the selected economic indicators appearing in Section 1 of the monthly *Canadian Statistical Review*. The latest revised monthly and quarterly data, both seasonally adjusted and unadjusted are given for these indicators up to December 1979. They may be best updated by referring to current issues of the *Canadian Statistical Review*.

### NOTE ON CANSIM

Series published in the Supplement are available from CANSIM. All or any part of the CANSIM data bank contents may be purchased on magnetic tapes or as computer printouts. The CANSIM identifiers appear with each series and should be used when ordering series. For further information direct inquiries to: Canadian Statistical Review, 23 M, R. H. Coats Bldg., Statistics Canada, Ottawa, K1A OT6.

## Introduction

Cette dix-neuvième livraison du *Supplément annuel de la Revue statistique du Canada* décrit en détail l'évolution de certains indicateurs économiques qui figurent à la section 1 des livraisons mensuelles de la *Revue statistique du Canada*. Les plus récentes données mensuelles et trimestrielles rectifiées y sont présentées, aussi bien avant qu'après désaisonnalisation, pour ces indicateurs et ce jusqu'en décembre 1979. La meilleure façon de les actualiser est de se reporter aux dernières livraisons de la *Revue statistique du Canada*.

### NOTE CONCERNANT CANSIM

Les séries présentées dans le Supplément sont stockées dans le CANSIM. On peut se procurer contre acquittement des frais l'ensemble ou une partie du contenu de la banque de données CANSIM sous forme de bandes magnétiques ou d'imprimés d'ordinateur. Les indicatifs du CANSIM, accompagnent chacune des séries et doivent être utilisés pour une commande de séries. Pour de plus amples renseignements, s'adresser à: Revue statistique du Canada, 23 M, Édifice R.H. Coats, Statistique Canada, Ottawa, K1A OT6.

## Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

CANSIM Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-0575) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

## Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A 0V7, ou à Imprimerie et édition, Approvisionnements et Services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Division CANSIM,

Statistique Canada, Ottawa, K1A 0T6(téléphone: 995-0575) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

## Note to Users

Data in this publication were retrieved from CANSIM (Registered Trade Mark of Statistics Canada for its Canadian Socio-economic Information Management System) and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in the Supplement (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used is the X-11-ARIMA method developed at Statistics Canada. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD it is one, for the most erratic series it is six. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

## Editor's Note

The CSR staff is always examining new ways of presenting information to its readers. Please do not hesitate to inform us of your needs and to offer us your suggestions.

## Note

In the tables, components may not necessarily sum to totals because of rounding.

## Note aux lecteurs

Les données qui apparaissent dans la Revue statistique du Canada ont été extraites du CANSIM (marque déposée de Statistique Canada pour son "Système canadien d'information socio-économique") et traitées pour donner une copie destinée à la photocomposition et à partir de laquelle cette publication est produite. CANSIM est la banque informatique de données de Statistique Canada. Les séries qui se trouvent dans le Supplément (ainsi que d'autres données) sont disponibles sur imprimés d'ordinateur, cartes, bandes ou par accès direct au terminal.

Le procédé utilisé pour la désaisonnalisation des séries chronologiques à Statistique Canada fait appel à l'application informatique d'un rapport à la moyenne mobile. Le programme informatique standard utilisé est la méthode X-11-ARMMI développée à Statistique Canada. La désaisonnalisation supprime les effets des variations répétitives qui se produisent dans l'année et sont imputables à l'évolution normale du climat, aux congés fixes, ou à d'autres événements qui se répètent à des intervalles réguliers.

Bien que la désaisonnalisation permette de mettre bien mieux en évidence la tendance fondamentale d'une série, les séries désaisonnalisées n'en contiennent pas moins des fluctuations irrégulières. De légères variations d'un mois à l'autre dans les séries désaisonnalisées peuvent être de simples mouvements irréguliers, et pour avoir une meilleure idée de la tendance fondamentale, les utilisateurs doivent examiner les séries désaisonnalisées d'un certain nombre de mois. Le MDC, ou mois à dominance cyclique, dans un tableau contenant des séries désaisonnalisées, donne le plus petit nombre de mois pour lesquels le taux de variation moyen compte non tenu du signe de la tendance générale, est supérieur à celui du facteur irrégulier. Dans le cas de la série la plus lisse possible, le MDC est égal à un; dans celui de la série la plus irrégulière, il est égal à six. L'application d'une moyenne mobile dont la période est égale au MDC tend à lisser les mouvements irréguliers pouvant dissimuler la tendance fondamentale.

## Note du rédacteur-réviseur

Le personnel de la Revue est toujours à la recherche de nouveaux modes de présentation de l'information à ses lecteurs. N'hésitez pas à nous faire connaître vos besoins et à nous présenter vos suggestions.

## Nota

Dans ces tableaux, les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

## Introduction

This twentieth edition of the *Annual Supplement to the Canadian Statistical Review* gives historical detail for the selected economic indicators appearing in Section 1 of the monthly *Canadian Statistical Review*. The latest revised monthly and quarterly data, both seasonally adjusted and unadjusted are given for these indicators up to December 1980. They may be best updated by referring to current issues of the *Canadian Statistical Review*.

### NOTE ON CANSIM

Series published in the Supplement are available from CANSIM. All or any part of the CANSIM data bank contents may be purchased on magnetic tapes or as computer printouts. The CANSIM identifiers appear with each series and should be used when ordering series. For further information direct inquiries to: Canadian Statistical Review, 9 R, R. H. Coats Bldg., Statistics Canada, Ottawa, K1A 0T6.

## Introduction

Cette vingtième livraison du *Supplément annuel de la Revue statistique du Canada* décrit en détail l'évolution de certains indicateurs économiques qui figurent à la section 1 des livraisons mensuelles de la *Revue statistique du Canada*. Les plus récentes données mensuelles et trimestrielles rectifiées y sont présentées, aussi bien avant qu'après désaisonnalisation, pour ces indicateurs et ce jusqu'en décembre 1980. La meilleure façon de les actualiser est de se reporter aux dernières livraisons de la *Revue statistique du Canada*.

### NOTE CONCERNANT CANSIM

Les séries présentées dans le Supplément sont stockées dans le CANSIM. On peut se procurer contre acquittement des frais l'ensemble ou une partie du contenu de la banque de données CANSIM sous forme de bandes magnétiques ou d'imprimés d'ordinateur. Les indicatifs du CANSIM, accompagnent chacune des séries et doivent être utilisés pour une commande de séries. Pour de plus amples renseignements, s'adresser à: Revue statistique du Canada, 9 R, Édifice R.H. Coats, Statistique Canada, Ottawa, K1A 0T6.

### Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

CANSIM Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0575) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(949-4020)
Halifax	(426-5331)	Regina	(359-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(992-4734)	Vancouver	(666-3691)
Toronto	(966-6586)		

Toll free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by Northwest Telephone Co.)	Zenith 0-8913
Northwest Territories (area served by Northwest Telephone Co.)	Zenith 2-2015

### How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

### Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Division CANSIM,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0575) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(949-4020)
Halifax	(426-5331)	Regina	(359-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(992-4734)	Vancouver	(666-3691)
Toronto	(966-6586)		

Un service de communication sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

## Note to Users

Data in this publication were retrieved from CANSIM (Registered Trade Mark of Statistics Canada for its Canadian Socio-economic Information Management System) and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in the Supplement (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used is the X-11-ARIMA method developed at Statistics Canada. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD it is one, for the most erratic series it is six. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

## Editor's Note

The CSR staff is always examining new ways of presenting information to its readers. Please do not hesitate to inform us of your needs and to offer us your suggestions.

## Note

In the tables, components may not necessarily sum to totals because of rounding.

## Note aux lecteurs

Les données qui apparaissent dans la Revue statistique du Canada ont été extraites du CANSIM (marque déposée de Statistique Canada pour son "Système canadien d'information socio-économique") et traitées pour donner une copie destinée à la photocomposition et à partir de laquelle cette publication est produite. CANSIM est la banque informatique de données de Statistique Canada. Les séries qui se trouvent dans le Supplément (ainsi que d'autres données) sont disponibles sur imprimés d'ordinateur, cartes, bandes ou par accès direct au terminal.

Le procédé utilisé pour la désaisonnalisation des séries chronologiques à Statistique Canada fait appel à l'application informatique d'un rapport à la moyenne mobile. Le programme informatique standard utilisé est la méthode X-11-ARMMI développée à Statistique Canada. La désaisonnalisation supprime les effets des variations répétitives qui se produisent dans l'année et sont imputables à l'évolution normale du climat, aux congés fixes, ou à d'autres événements qui se répètent à des intervalles réguliers.

Bien que la désaisonnalisation permette de mettre bien mieux en évidence la tendance fondamentale d'une série, les séries désaisonnalisées n'en contiennent pas moins des fluctuations irrégulières. De légères variations d'un mois à l'autre dans les séries désaisonnalisées peuvent être de simples mouvements irréguliers, et pour avoir une meilleure idée de la tendance fondamentale, les utilisateurs doivent examiner les séries désaisonnalisées d'un certain nombre de mois. Le MDC, ou mois à dominance cyclique, dans un tableau contenant des séries désaisonnalisées, donne le plus petit nombre de mois pour lesquels le taux de variation moyen compte non tenu du signe de la tendance générale, est supérieur à celui du facteur irrégulier. Dans le cas de la série la plus lisse possible, le MDC est égal à un; dans celui de la série la plus irrégulière, il est égal à six. L'application d'une moyenne mobile dont la période est égale au MDC tend à lisser les mouvements irréguliers pouvant dissimuler la tendance fondamentale.

## Note du rédacteur-réviseur

Le personnel de la Revue est toujours à la recherche de nouveaux modes de présentation de l'information à ses lecteurs. N'hésitez pas à nous faire connaître vos besoins et à nous présenter vos suggestions.

## Nota

Dans ces tableaux, les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

## Introduction

This twenty first edition of the *Annual Supplement to the Canadian Statistical Review* gives historical detail for the selected economic indicators appearing in Section 1 of the monthly *Canadian Statistical Review*. The latest revised monthly and quarterly data, both seasonally adjusted and unadjusted are given for these indicators up to December 1981. They may be best updated by referring to current issues of the *Canadian Statistical Review*.

### NOTE ON CANSIM

Series published in the Supplement are available from CANSIM. All or any part of the CANSIM data bank contents may be purchased on magnetic tapes or as computer printouts. The CANSIM identifiers appear with each series and should be used when ordering series. For further information direct inquiries to: Canadian Statistical Review, 9 R, R. H. Coats Bldg., Statistics Canada, Ottawa, K1A OT6.

## Introduction

Cette vingt-et-une livraison du *Supplément annuel de la Revue statistique du Canada* décrit en détail l'évolution de certains indicateurs économiques qui figurent à la section 1 des livraisons mensuelles de la *Revue statistique du Canada*. Les plus récentes données mensuelles et trimestrielles rectifiées y sont présentées, aussi bien avant qu'après désaisonnalisation, pour ces indicateurs et ce jusqu'en décembre 1981. La meilleure façon de les actualiser est de se reporter aux dernières livraisons de la *Revue statistique du Canada*.

### NOTE CONCERNANT CANSIM

Les séries présentées dans le Supplément sont stockées dans le CANSIM. On peut se procurer contre acquittement des frais l'ensemble ou une partie du contenu de la banque de données CANSIM sous forme de bandes magnétiques ou d'imprimés d'ordinateur. Les indicatifs du CANSIM, accompagnent chacune des séries et doivent être utilisés pour une commande de séries. Pour de plus amples renseignements, s'adresser à: Revue statistique du Canada, 9 R, Édifice R.H. Coats, Statistique Canada, Ottawa, K1A OT6.

Avril	Aperçu du Projet d'établissement de statistique sur l'emploi
Mai	Résumé du Guide de la statistique du travail du gouvernement fédéral
Juillet	Le calcul des effets de l'augmentation du prix canadien du pétrole brut au niveau international par le Modèle des Prix de Statistique Canada
Août	La classification type des industries révisée 1980, et l'intégration de la statistique économique
Octobre	CANSEL: Un système automatique de recherche, de sélection et d'extraction pour CANSIM
Novembre	L'instruction et les activités de loisir

**1981**

Janvier	Disponibilité nationale apparente de certains produits fabriqués
Février	Les dichotomies urbain-rural, agricole non agricole sont-elles dépassées?
Mars	Les Régimes Privés de Retraite et La Situation Socio-Économique
Avril	Guide de la statistique de la propriété et du contrôle étrangers au Canada
Mai	Le Rôle des Non-Residents sur le Marché Monétaire Canadien
Juin	Produit national brut – Premier trimestre 1981
Juillet	L'Assurance – vie au Canada, 1961 à 1979
Octobre	Statistique de l'environnement: Cadres structuels et approche uniformisée
Novembre	Le point sur la situation économique des personnes âgées

**1982**

Mars	Produit national brut – Quatrième trimestre 1981
Avril	Le produit intérieur brut
Mai	Un analyse des dépenses hospitalières au Canada
Juin	L'activité financière au Canada

**Gross National Product, Current Dollars (millions of dollars)**  
**Produit national brut, en dollars courants (millions de dollars)**

### Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

CANSIM Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0575) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwTel Inc.)	Zenith 2-2015

### How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

### Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Division CANSIM,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0575) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

## Note to Users

Data in this publication were retrieved from CANSIM (Official Mark of Statistics Canada for its Canadian Socio-economic Information Management System) and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in the Supplement (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used is the X-11-ARIMA method developed at Statistics Canada. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD it is one, for the most erratic series it is six. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

## Editor's Note

The CSR staff is always examining new ways of presenting information to its readers. Please do not hesitate to inform us of your needs and to offer us your suggestions.

## Note

In the tables, components may not necessarily sum to totals because of rounding.

## Note aux lecteurs

Les données qui apparaissent dans la Revue statistique du Canada ont été extraites du CANSIM (marque officielle de Statistique Canada pour son "Système canadien d'information socio-économique") et traitées pour donner une copie destinée à la photocomposition et à partir de laquelle cette publication est produite. CANSIM est la banque informatique de données de Statistique Canada. Les séries qui se trouvent dans le Supplément (ainsi que d'autres données) sont disponibles sur imprimés d'ordinateur, cartes, bandes ou par accès direct au terminal.

Le procédé utilisé pour la désaisonnalisation des séries chronologiques à Statistique Canada fait appel à l'application informatique d'un rapport à la moyenne mobile. Le programme informatique standard utilisé est la méthode X-11-ARMMI développée à Statistique Canada. La désaisonnalisation supprime les effets des variations répétitives qui se produisent dans l'année et sont imputables à l'évolution normale du climat, aux congés fixes, ou à d'autres événements qui se répètent à des intervalles réguliers.

Bien que la désaisonnalisation permette de mettre bien mieux en évidence la tendance fondamentale d'une série, les séries désaisonnalisées n'en contiennent pas moins des fluctuations irrégulières. De légères variations d'un mois à l'autre dans les séries désaisonnalisées peuvent être de simples mouvements irréguliers, et pour avoir une meilleure idée de la tendance fondamentale, les utilisateurs doivent examiner les séries désaisonnalisées d'un certain nombre de mois. Le MDC, ou mois à dominance cyclique, dans un tableau contenant des séries désaisonnalisées, donne le plus petit nombre de mois pour lesquels le taux de variation moyen compte non tenu du signe de la tendance générale, est supérieur à celui du facteur irrégulier. Dans le cas de la série la plus lisse possible, le MDC est égal à un; dans celui de la série la plus irrégulière, il est égal à six. L'application d'une moyenne mobile dont la période est égale au MDC tend à lisser les mouvements irréguliers pouvant dissimuler la tendance fondamentale.

## Note du rédacteur-réviseur

Le personnel de la Revue est toujours à la recherche de nouveaux modes de présentation de l'information à ses lecteurs. N'hésitez pas à nous faire connaître vos besoins et à nous présenter vos suggestions.

## Nota

Dans ces tableaux, les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

## Introduction

This twenty second edition of the *Annual Supplement to the Canadian Statistical Review* gives historical detail for the selected economic indicators appearing in Section 1 of the monthly *Canadian Statistical Review*. The latest revised monthly and quarterly data, both seasonally adjusted and unadjusted are given for these indicators up to December 1982. They may be best updated by referring to current issues of the *Canadian Statistical Review*.

### NOTE ON CANSIM

Series published in the Supplement are available from CANSIM. All or any part of the CANSIM data bank contents may be purchased on magnetic tapes or as computer printouts. The CANSIM identifiers appear with each series and should be used when ordering series. For further information direct inquiries to: Canadian Statistical Review, 9 R, R. H. Coats Bldg., Statistics Canada, Ottawa, K1A OT6.

## Introduction

Cette vingt deuxième livraison du *Supplément annuel de la Revue statistique du Canada* décrit en détail l'évolution de certains indicateurs économiques qui figurent à la section I des livraisons mensuelles de la *Revue statistique du Canada*. Les plus récentes données mensuelles et trimestrielles rectifiées y sont présentées, aussi bien avant qu'après désaisonnalisation, pour ces indicateurs et ce jusqu'en décembre 1982. La meilleure façon de les actualiser est de se reporter aux dernières livraisons de la *Revue statistique du Canada*.

### NOTE CONCERNANT CANSIM

Les séries présentées dans le Supplément sont stockées dans le CANSIM. On peut se procurer contre acquittement des frais l'ensemble ou une partie du contenu de la banque de données CANSIM sous forme de bandes magnétiques ou d'imprimés d'ordinateur. Les indicatifs du CANSIM, accompagnent chacune des séries et doivent être utilisés pour une commande de séries. Pour de plus amples renseignements, s'adresser à: Revue statistique du Canada, 9 R, Édifice R.H. Coats, Statistique Canada, Ottawa, K1A OT6.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

CANSIM Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-8200) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Zenith 2-2015

## How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Division CANSIM,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-8200) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Terre-Neuve et Labrador	Zenith 0-7037
Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
Colombie-Britannique (sud et centrale)	112-800-663-1551
Yukon et nord de la C.-B. (territoire desservi par la NorthwesTel Inc.)	Zenith 0-8913
Territoires du Nord-Ouest (territoire desservi par la NorthwesTel Inc.)	Zenith 2-2015

## Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux locaux de Statistique Canada, ou en écrivant à la Section des ventes et de la distribution des publications, Statistique Canada, Ottawa, K1A 0T6.

## **NOTE ON CANSIM**

Series published in the Supplement are available from CANSIM. All or any part of the CANSIM data bank contents may be purchased on magnetic tapes or as computer printouts. The CANSIM identifiers appear with each series and should be used when ordering series. For further information direct inquiries to: Canadian Statistical Review, 9 R, R. H. Coats Bldg., Statistics Canada, Ottawa, K1A 0T6.

## **NOTE CONCERNANT CANSIM**

Les séries présentées dans le Supplément sont stockées dans le CANSIM. On peut se procurer contre acquittement des frais l'ensemble ou une partie du contenu de la banque de données CANSIM sous forme de bandes magnétiques ou d'imprimés d'ordinateur. Les indicatifs du CANSIM, accompagnent chacune des séries et doivent être utilisés pour une commande de séries. Pour de plus amples renseignements, s'adresser à: Revue statistique du Canada, 9 R, Édifice R.H. Coats, Statistique Canada, Ottawa, K1A 0T6.

Indicateurs économiques avancés pour le Canada, données filtrées, variance en pourcentage du prix par coûts unitaires de main-d'oeuvre	54

## Note to Users

Data in this publication were retrieved from CANSIM (Official Mark of Statistics Canada for its Canadian Socio-economic Information Management System) and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in the Supplement (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used is the X-11-ARIMA method developed at Statistics Canada. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD it is one, for the most erratic series it is six. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

## Editor's Note

The CSR staff is always examining new ways of presenting information to its readers. Please do not hesitate to inform us of your needs and to offer us your suggestions.

## Note

In the tables, components may not necessarily sum to totals because of rounding.

## Note aux lecteurs

Les données qui apparaissent dans la Revue statistique du Canada ont été extraites du CANSIM (marque officielle de Statistique Canada pour son "Système canadien d'information socio-économique") et traitées pour donner une copie destinée à la photocomposition et à partir de laquelle cette publication est produite. CANSIM est la banque informatique de données de Statistique Canada. Les séries qui se trouvent dans le Supplément (ainsi que d'autres données) sont disponibles sur imprimés d'ordinateur, cartes, bandes magnétiques ou par accès direct au terminal.

Le procédé utilisé pour la désaisonnalisation des séries chronologiques à Statistique Canada fait appel à l'application informatique d'un rapport à la moyenne mobile. Le programme informatique standard utilisé est la méthode X-11-ARMMI développée à Statistique Canada. La désaisonnalisation supprime les effets des variations répétitives qui se produisent dans l'année et sont imputables à l'évolution normale du climat, aux congés fixes, ou à d'autres événements qui se répètent à des intervalles réguliers.

Bien que la désaisonnalisation permette de mettre bien mieux en évidence la tendance fondamentale d'une série, les séries désaisonnalisées n'en contiennent pas moins des fluctuations irrégulières. De légères variations d'un mois à l'autre dans les séries désaisonnalisées peuvent être de simples mouvements irréguliers, et pour avoir une meilleure idée de la tendance fondamentale, les utilisateurs doivent examiner les séries désaisonnalisées d'un certain nombre de mois. Le MDC, ou mois à dominance cyclique, dans un tableau contenant des séries désaisonnalisées, donne le plus petit nombre de mois pour lesquels le taux de variation moyen compte non tenu du signe de la tendance générale, est supérieur à celui du facteur irrégulier. Dans le cas de la série la plus lisse possible, le MDC est égal à un; dans celui de la série la plus irrégulière, il est égal à six. L'application d'une moyenne mobile dont la période est égale au MDC tend à lisser les mouvements irréguliers pouvant dissimuler la tendance fondamentale.

## Note du rédacteur-réviseur

Le personnel de la Revue est toujours à la recherche de nouveaux modes de présentation de l'information à ses lecteurs. N'hésitez pas à nous faire connaître vos besoins et à nous présenter vos suggestions.

## Nota

Dans ces tableaux, les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

## Introduction

This twenty third edition of the *Annual Supplement to the Canadian Statistical Review* gives historical detail for the selected economic indicators appearing in Section I of the monthly *Canadian Statistical Review*. The latest revised monthly and quarterly data, both seasonally adjusted and unadjusted are given for these indicators up to December 1983. They may be best updated by referring to current issues of the *Canadian Statistical Review*.

## Introduction

Cette vingt troisième livraison du *Supplément annuel de la Revue statistique du Canada* décrit en détail l'évolution de certains indicateurs économiques qui figurent à la section I des livraisons mensuelles de la *Revue statistique du Canada*. Les plus récentes données mensuelles et trimestrielles rectifiées y sont présentées, aussi bien avant qu'après désaisonnalisation, pour ces indicateurs et ce jusqu'en décembre 1983. La meilleure façon de les actualiser est de se reporter aux dernières livraisons de la *Revue statistique du Canada*.
